FORD

Weak Links in a Strong Chain

That's just what imitation parts are when they become a part of your Ford car. They look strong enough, but the metal isn't therethe strong, durable Vanadium steel that goes into the Ford chassis and every Ford part. Ford parts are specially cast and heat-treated, each according to its use. Some require a hard, fiint-like wearing surface, others need resiliency, and some need just "toughness." Ford metallurgists have been studying these problems for sixteen years and know just how each unit should be made to endure a maxi-

mum of wear and tear. They know that best results can be obtained only by the use of special formulas for different parts, and that honest Ford parts wear from thirty-five to one hundred per cent longer than We carry complete assortments of genuine Ford parts for both passenger cars and trucks. And our garage is equipped to give careful, prompt Ford service—from minor adjustments to complete overhauls. Drive in, it's better to be safe than sorry. Come to the Authorized
